

1. (original): A process for dyeing cellulosic fibre materials, wherein the fibre material is brought into contact with at least two dyes from the group of formulae

(1),

(2),

(3) and

(4),

wherein

A is hydrogen or a radical of formula

(5),

R_1 , R_2 , R_3 and R_4 are each independently of the others halogen, C_1 - C_4 alkyl or C_1 - C_4 alkoxy,

R_5 is halogen, C_1 - C_4 alkyl, C_1 - C_4 alkoxy, nitro, benzoylamino which is unsubstituted or substituted in the phenyl ring, or unsubstituted or substituted amino,

n , m , r and s are each independently of the others the number 0, 1 or 2, and

p is the number 0, 1, 2, 3 or 4.

2. (currently amended): A process according to claim 1, wherein

R_1 , R_2 , R_3 , R_4 and R_5 are each independently of the others halogen or C_1 - C_4 alkyl, especially chlorine or methyl.

3. (currently amended): A process according to ~~either claim 1 or claim 2~~ claim 1, wherein

n , m , r and s are each independently of the others 0 or 1.

4. (currently amended): A process according to ~~any one of claims 1 to 3~~ claim 1, wherein p is the number 0, 1 or 2, ~~especially 0 or 1~~.

5. (currently amended): A process according to ~~any one of claims 1 to 4~~ claim 1, wherein dyeing is carried out at a pH of from 10.2 to 11.8.

6. (currently amended): A process according to ~~any one of claims 1 to 5~~ claim 1, wherein dyeing is carried out at a pH of from 10.8 to 11.6.

7. (currently amended): A process according to ~~any one of claims 1 to 6~~ claim 1, wherein the dyes are applied by the pad-dyeing method.

8. (currently amended): A process according to ~~any one of claims 1 to 7~~ claim 1, wherein the dyeing process is carried out continuously in a plurality of passes.

9. (currently amended): A process according to ~~any one of claims 1 to 8~~ claim 1, wherein the dyeing process is carried out on a hank dyeing machine or an open-width dyeing machine.

10. (original): A dye mixture comprising at least two dyes from the group of formulae

(3) and

wherein

A is hydrogen or a radical of formula

(5),

R_1 , R_2 , R_3 and R_4 are each independently of the others halogen, C_1 - C_4 alkyl or C_1 - C_4 alkoxy,

R_5 is halogen, C_1 - C_4 alkyl, C_1 - C_4 alkoxy, nitro, benzoylamino which is unsubstituted or substituted in the phenyl ring, or unsubstituted or substituted amino,

n , m , r and s are each independently of the others the number 0, 1 or 2, and

p is the number 0, 1, 2, 3 or 4.

11. (new): A process according to claim 1, wherein

R_1 , R_2 , R_3 , R_4 and R_5 are each independently of the others chlorine or methyl.
